Klimatkollen

10 ways you can use Klimatkollen to create change

1. **CONTACT COMPANIES.** At klimatkollen.se, check which companies have increased their emissions, or do not report emissions at all. Contact them and ask how they plan to reduce their emissions, or when they will start reporting them. Do they have offices where you live? Organise a demonstration outside. If you are a shareholder, attend annual general meetings and ask critical questions about their climate work.
2. **DRIVE CHANGE AT WORK.** Drive sustainability efforts where you work. In sustainability reports on klimatkollen.se, you can read about companies' climate initiatives in your industry. Get inspired and bring your own ideas to your workplace. You can also download our data via the Klimatkollen API.
3. **QUESTION POLITICIANS.** Find out how emissions and the climate transition are progressing in your municipality at klimatkollen.se. Then put questions to politicians and civil servants. Do they monitor their emissions? Do they have measurable emissions targets and how are these followed up? Is there a climate plan – if not, when?
4. **PARTICIPATE IN DEBATES.** Are you going to listen to a debate or public hearing, or perhaps participate yourself? Formulate questions and talking points based on our data and let facts guide the discussion.
5. **DEMONSTRATE.** Display figures and rankings from our lists on signs, banners and leaflets at municipal council meetings and peaceful demonstrations.
6. **WRITE A CITIZENS' PROPOSAL.** Draw on the climate data for your municipality, and look at other municipalities' climate plans for ideas on climate action. *See templates*.
7. **JOIN A CAMPAIGN.** Participate in and spread campaigns that use our statistics as a starting point – or start your own.
8. **CREATE YOUR OWN INITIATIVES.** Use the data as a starting point and do your own analyses, combine it with other data and cross-analyse.
9. **REACH OUT THROUGH MEDIA.** Use the data as source material for articles and opinion pieces in local media and member publications, or for radio programmes and podcasts. Write yourself or tip off journalists – and write about something that relates to your organisation, municipality, county or the companies in your area.
10. **SHARE ON SOCIAL MEDIA.** Follow us and like, comment, save and share our posts so that more people gain climate knowledge. Create your own posts, e.g. take screenshots from our site or use our top lists to find angles that are relevant locally where you live.

klimatkollen.se /klimatkollen @klimatkollen.se /klimatkollen

KLIMATKOLLEN is an open civic platform that helps people, organisations and companies follow the climate transition. We use open data sources and AI to gather and analyse climate data, and show how emissions are progressing compared to how they should be. We have facts about Sweden's municipalities, regions, the national level and major Swedish companies.

OUR VISION is a well-informed and growing public opinion that influences decision-makers in politics and business to take measures reducing emissions in line with the Paris Agreement.
